The latest excuse was that sending personal and missile (They don't have any missile for it after 2 YEARS!) is that sending this equipment and personnel could propagate Corona-chan!

Sorry...I lost wifi just as I hit post, earlier.
•Since I knew what you were hinting at, but because you were being rather cryptic, I decided not to post this rather fun graphic.
Now I will.
Hahahahaha. Good.
We NEED Russia on our side, especially in the PNW, in the Arctic, and in the Caribbean...just to to check all Chinese infiltration surrounding us.
Think of the Gulf of Mexico. Russia is already nearby, right there in Venezuela where the CCP is firmly embedded. Having eyes on everywhere the CCP is is tantamount to our National Security.
Trudeau, and our other neighbors in Mexico, need to be sent a message, also.
>In my mind, stopping the Chink Menace Worldwide is Paramount to us all.
Okay, I will stop now.
>And, Thank You for the video.
Carry On.

It's also being done right as a typhoon makes landfall on China's east coast.

>typhoon makes landfall
what are the implications of that? can a typhoon 'jam' the radar so they can't see it? they say it's 'unarmed', could it be used for cloud seeding so they get even more rain in the following weeks? i dunno, just speculating here...

why do they only test babydick ranges like that? surely they should be testing 9900km ranges, if they're being honest with the intent?
